

CITY OF NAPLES

EAST NAPLES BAY DREDGING AND ROCK REMOVAL PROJECT

FEBRUARY 2026

PROJECT UPDATE

- Quality Enterprises is currently working on Canal DD-DD. Estimated completion of this canal is spring 2026.

Please keep in mind:

- Boats on lifts can usually remain on the lift. Boats in the water need to be relocated to reduce risk to private property and allow QE easier access to the canals.
- Canal ingress/egress will be limited during the 8-5 workday when the turbidity curtain will be in place. Due to this limitation, QE encourages you to remove your boat from the canal if you would like to use it during the time they are working in your canal.
- During the time that work is being performed in your canal you may also choose to trailer your boat and keep it in your yard. While work is performed in your canal, code enforcement will not require you to move it or fine you.

General Information:

- The City's Public Outreach consultant for the project CMA Outreach, Inc., can field most questions and should be the first point of contact for residents. See contact information below.
- Residents can sign up for updates and also contact CMA Outreach, Inc. through the project website by scrolling to the bottom and fill out your contact information, be sure to check the box for project updates to ensure you are kept up to date on the project.
- Targeted emails will be sent to residents prior to the contractor starting work in your canal. Otherwise, emails will be limited to overall project updates.
- Access to the weekly progress reports that are submitted to the City can be found here, click on Files and choose the week you would like to see: <https://www.naplesgov.com/streetsstormwater/project/east-naples-bay-2020-2021-dredging-project>
- Access to the Post Ian 100% Design plans can be found here: <https://www.naplesgov.com/media/95101>

See Figure Below for Street Names (figure can be found on website listed below):
